

Rooted in the spirit of the PAM (Pertubuhan Akitek Malaysia) logo, this design reimagines its familiar form through a sharper, pixelated language. Instead of flowing curves, the motif is rendered in jagged geometry—echoing the interlacing threads and disciplined rhythm of songket weaving. Each fragmented edge reflects structure, precision, and the constructive nature of architecture itself.

Complementing the central motif are lines and dots, abstracted from the PAM emblem. These elemental marks—point and line—are the architect's first tools, the genesis of every plan and vision. Together, they weave tradition and modernity into a pattern that honors craft, structure, and the art of building ideas into form.
